Education

Kongu Engineering College <i>B.Tech in Information Technology</i>	Nov 2025 – Present <i>CGPA: 8.37/10</i>
Omega International School, Chennai <i>Higher Secondary (CBSE)</i>	2023 <i>90.8%</i>

Technical Skills

- | | |
|--|---|
| <ul style="list-style-type: none">• Programming: Java, JavaScript, Python• Frontend: HTML5, CSS3, React.js• Styling: Bootstrap, Basic SASS• Backend: Node.js, Express• DevOps: Git, GitHub, Docker (Basics) | <ul style="list-style-type: none">• Libraries: Redux (Basics), Axios, Scikit-Learn• Tools: Linux, Bash, Thunder Client, Jupyter• Databases: MongoDB, PostgreSQL• Concepts: Component-based Architecture, REST APIs, Basic Unit Testing |
|--|---|

Experience

National Technical Research Organization <i>Intern – Machine Learning & Cryptography Research</i>	New Delhi, India Apr 2025 – Sep 2025
• Cipher Systems Research - Analyzed classical and mechanical cipher systems, reverse engineered HC-series cipher machines to identify structural vulnerabilities. • ML-Based Cipher Classification - Developed an end-to-end ML pipeline using NIST-based feature engineering for accurate cipher identification. • Automated Reasoning System - Designed a Neo4j-based graph reasoning system with rule-based inference for classification of classical ciphers. • Links: Repository — Report	

Projects

Loyal CMS Platform (Repo) (Live)	Present
Built a CMS-driven web application using React, Node.js, Express, and SQLite (Prisma) with responsive UI, secure JWT-based admin workflows, and RESTful APIs for scalable content management.	
InovTrack (Project Link)	November 2024
Built a full-stack platform to map student skill profiles to relevant projects and enable collaborative development using React, Node.js, and PostgreSQL , with keyword-based matching and dynamic UI updates for improved skill alignment.	
TorpedoX (Project Link)	April 2025
TorpedoX is an ML based tool designed to identify cryptographic algorithms and hash functions. We developed FFNN and Random Forest models to classify and analyze both classical and modern ciphers with high accuracy. Python, PyTorch, Numpy, Pandas, Scikit-Learn. .	

Achievements

- | | |
|---|---------------------------|
| • Winners @ Smart India Hackathon 2024 : Competing against 80,000+ teams nationwide. | Dec 2024 |
| • Joint Secretary, IT Association | Nov 2025 – Present |
| • Student POC, Innovation and Entrepreneurship Forum | Jan 2025 |

Certifications

- **GUVI DevOps Certification** (View Certificate)
- **NPTEL: Design & Implementation of Human-Computer Interfaces**
